

# Using numbers in hobbies and sports

**Numbers are all around us, and they help us all to do the things we enjoy.**

When you think about it, there are lots of ways that we use numbers when doing our favourite hobbies and sports.

Have a look at the hobbies below and think about how you would use numbers when doing them. The first example is completed for you to give you some clues – try to think of as many answers as possible.

## Football

- Using the league table to work out how many points a team might need to win the league
- Understanding distances on the pitch
- Recognising shapes on the pitch, such as the centre circle
- Understanding time, using the 90-minute game-time
- Probability in a cup draw
- Looking at statistics – e.g. possession percentages

**Can you think of any others? Add them here:**
